Purple-leaved Japanese Maple (Acer polymor-
phum var. atropurpureum). This is one of the
most striking of all the low-growing Maples, be-
ing a small-sized tree, not growing over 6 ft. in
height. Its foliage is very deeply lobed and of a
very dark blood-red color when coming into leaf in

the spring. As the foliage grows older it changes to
a very much brighter color, holding this shade up until
frost. The tree is very globular in its habit of
growth, and is excellent for lawn planting. This
tree after becoming well established is perfectly
hardy and stands our winter without becoming in any

Cut-leaved Purple Japanese Maple (Acer poly-

morphum var. dissectum atropurpureum). This is
one of the most beautiful of all the Japanese Maples.
The foliage is very deeply and finely cut, having a
decided fern-like appearance. The color of the

foliage is the same as the preceding Maple and holds
its color equally as well. Another interesting feature
about this Maple is that it has a decided weeping
appearance, although it is not by any means a weep-
ing tree. This tree is also dwarf-growing, and is the
most desirable of the dwarf-growing trees. Price,
1-2 ft., $1.50.

Red-flowering Horse Chestnut (Aesculus Hippo-
castanum var. rubicunda). This tree is a variety
of our common Horse Chestnut, although it is not so
vigorous in its habits of growth, making a very much
smaller tree. The leaves of this tree are bright
green. It blossoms a week or so earlier than the
common Horse Chestnut, and the flowers are a very
showy red. It is one of the most desirable of the
summer-flowering trees. Price, 4-5 ft., $1.00.

Koelreuteria paniculata. This is one of the
hardy trees from the north of China, introduced into
England somewhere in the early part of the eight-
teenth century, and has been a long time in culture
in the United States, although it is not generally
known. The foliage of this tree is more or less cut,
which gives it a decided feathery appearance.
The leaves are of a yellow tinge, which makes quite a
contrast to the other foliage trees. The flowers are
borne on long spikes at the end of the branch, and
are of a bright golden-yellow. This tree while young
has not a very regular habit of growth, but as it
grows older it becomes more uniform, and makes a
pretty lawn tree. Price, 5-7 ft., $1.00.

Tulip Tree (Liriodendron tulipifera). This is a
much taller growing tree than any we have men-
tioned. Of course everybody is more or less ac-
quainted with this tree. It is a forest tree native
from southern Connecticut to all south of New York.
It is particularly hardy here in the north. The tree
is very regular in its habit of growth, and its leaves
are truncate in shape. The flowers are borne in the
month of June, and are of the size and form of tulips.
They are of a greenish-yellow. This is one of the
most desirable lawn trees. Price, 6-8 ft., $1.00.

Staghorn Sumac (Rhus typhina var. laciniata).
This is one of the newest and most recent introduc-
tions of the Sumac family.
The original tree was found by Mr. Manning some
years ago. (See illustration on page 2.)
This tree grows about 8 or 10 ft. in height, and is one of the most unique of all of our cut-leaved trees. The foliage is very finely cut and is decidedly fern-like in appearance. Its autumn coloring is of the brightest of hues, and is one of the most pleasing trees to have on your lawn. This tree has an advantage over many trees, viz., that it will do quite well in very light and barren soils. The branches of the tree are covered with a thick hairy substance which gives it a very unique appearance in the winter. Price $2.00.

**Tiger Tail Spruce** (*Picea polita*). This is one of the most interesting of the Spruces, being very regular in its habit of growth, with thickly set branches covered with very stiff, curved, sharp-pointed leaves of a deep green. This tree is a native of the island of Nipon and is one of the choicest of evergreens. Price, 2-3 ft., $2.00.

**Koster’s Blue Spruce** (*Picea pungens var. Kosteriana*). Every person who is interested in the Rocky Mountain Blue Spruce should try if possible to give this variety a place on his lawn. There is considerable trouble in getting trees of a high blue color. This tree is imported and derives its name from its introducer. This variety is a grafted tree, and the scions are selected from the trees of the highest possible color, and they are the very best-shaped trees that a person can buy. No person having a nice place should be without one or two specimens of this variety. Price, 2 ½ feet, perfect in shape and color, $5.00.

**Swiss Stone Pine** (*Pinus Cembra*). This is one of the most desirable of all the Pines, growing very much after the style of our common White Pine, although it is much denser and smaller in its habit of growth. The color of the foliage and the length of the needles are very similar to our Common White Pine. It is a very desirable lawn tree. Specimens 1-2 ft., 75 cents; 3-4 ft., $2.00.

**Pyramidal Norway Spruce** (*Picea excelsa*). People having a limited space and desirous of a rapid-growing tree will by no means be disappointed in buying this tree. Its foliage is much like our common Norway Spruce. A tree averaging 6 ft. in height would spread about 2-3 ft. in width, which makes it very desirable to plant beside walks or in places where you wish to plant a tree that will not take up too much space. We have some very fine specimens which will be both pleasing and ornamental. Price, 3-4 ft., $1.00; 4-6 ft., $2.00.

**Stag-Horn Sumac.**

**Swiss Stone Pine.**

**Thread-branched Japanese Cypress** (*Retinospora filifera*). This is one of the prettiest and most ornamental of the Japanese Cypresses. The smaller branches having such a thread-like appearance gives the whole tree a most pleasing and interesting effect. Specimens, price, 2 ft., $1.00; 3-4 ft., $3.00.

**SHRUBS.**

**Aralia pentaphylla** (*Acanthopanax spinosa*). This is a very upright-growing shrub, suitable for individual planting or planting among other trees. The foliage is of a very bright glossy green; and the long slender branches are of a very light gray color with more or less spines. The flowers on this plant are inconspicuous. It is only desired on account of its bright, glossy colored foliage. Price, 3-4 ft., 50 cents.

**Golden-barked Cornel** (*Cornus stolonifera var. aurea*). This plant is entirely different from any of the cornels that are now in cultivation. The bark, instead of being the brilliant red color of most of the cornels, is of a bright yellow. The flowers are white, borne at the end of the branches, and are in flat cymes. This plant would be very desirable for massing purposes where a person desires a winter effect of its bark. This could be also used together...
with the other varieties of cornels. On account of its bright yellow color it makes a very striking con-
trast. It is also a very good individual plant. Price, $1.00.

Storked-barked Spindle Tree (Ehovmnes ala-
tus). This is a very rare Japanese shrub growing about 6 ft. in height. All of its branches are covered
with a very prominent coryck bark which gives it a very interesting effect. It is very pleasing in the fall
on account of the brilliant crimson coloring of its leaves. A person enjoying high-colored autumn foli-
age will be more pleased with this shrub. Price, 2-3 ft., $1.00.

Lemoine's Syringa (Philadelphus Lemoinei). It is one of the new Syringas being introduced into this
country from France. It is very upright in its habit of
growth. It is covered with small, yellow-white flowers, which envelop the entire plant. They are
very fragrant. Price, 50 cents.

Cut-leaved Golden Elder (Sambucus racemosus
var. plumosa folis aurea). This is one of the new
acquisitions of the Elder family. The foliage is very
finely cut, and its color is somewhat similar to the
common Golden Elder. The cut-leaved foliage gives
it a decided feathery and pleasing effect. Price, $1.00.

Viburnum plicatum tomentosum. This is a fertile specimen of the Japanese Snowball. Viburnum
plicatum is the same relation to the Japanese Snow-
ball that the High Bush Cranberry (Viburnum opuli) is
to the Guelder Rose (Viburnum opulis var. sterilis). This plant has very showy white flowers, borne in flat
cymes during May and early part of June. Its foli-
age is of a dark olive-green and it has brownish
branches. It makes a very beautiful lawn plant,
being very regular in its habit of growth. Price, 18
in., 50 cents; 2 ft., 50 cents; 2½-3 ft., $1.00.

Catesby's Andromeda (Leucothoae Catesbei). This is a very rare and very pretty American plant
belonging to the same family that the Lily of the
Valley belongs to. It is somewhat spreading in its habit of growth, and its foliage has a decided showy
appearance. The flowers are very large and are
borne on long spikes in the axils of the leaves. This
is a very desirable plant, being used in shady places
and on wet dark land. Price, 12 in., 35 cents; 18 in.,
50 cents.

In making out this list of Vines, we are not offering to
our clients any that are de-
cidedly new; in fact, all of
them are old introductions,
although they are among the
most desirable that we have
to-day. We have tried to
offer to you plants that will
give you most satisfactory
results in flower results and
vinel that will also give you
satisfaction as cover plants.

Dutchman's Pipe (Aris-
tolochia Siphon). A person
desiring a very rapid-grow-
ing vine, also a vine to use
for covering a porch, piazza,
etc., will make no mistake
in purchasing this plant.
This vine's foliage is very
pretty, growing from 6 to 8
in. in diameter. It is of a
dark, rich-green color. The
flowers on this plant are in-
conspicuous and are only
suitable to be used on a
porch or trellis, which you
wish to cover quickly. Price,
50 cents; extra strong,
$1.00.

Clematis Paniculata.
This is to-day one of the best
and most satisfactory of all
the Clematis. It is of rapid
growth. The leaves are of
a light-green color. The
most desirable feature of this
plant is its numerous white
flowers, which are borne in
the month of September.
The flowers are very prolific.
It is a very desirable plant.
Price, 50 cents.

Hall's Honeysuckle (Loniceru brachypoda Hal-
tana). This is also a very desirable flowering vine,
being in bloom all summer long. The flowers are
white and yellow and borne very profusely. It is a
very rapid grower and retains its foliage very late
into the winter; in fact, being very nearly an ever-

Clematis Paniculata.
PERENNIALS.

Double Mexican Sunflower (*Helianthus multi florum* fl. pl.). This is one of the most desirable of our fall-flowering Sunflowers. Grows about 6 ft. in height. Deep yellow flowers envelop the whole plant with profusion. The flowers are from 3-4 in. in diameter, with a very prominent row of guard petals. This plant makes a very compact shrubby clump and is very effective. Price, 25 cents.

OLD-FASHIONED GARDEN PINK.

(*Dianthus plumarius*).

This is a very interesting plant, which everybody is well acquainted with; it being the old-fashioned Garden Pink that is so common among the old New England homesteads. We have among this class of plants very showy varieties, some of them being the following:

- **Essex Witch**. This is a very fine pink variety, equally as good a bloomer as Her Majesty. Price, 20 cents.
- **Emperor**. Rich crimson, clove-scented, and very fragrant. Price, 20 cents.

PÆONIA.

Under this class of Herbaceous Perennials we find one of the most satisfactory plants of the list, which grows to be a very nice clump, flowering very profusely and giving you at the same time a very large range of color. It is a plant that is very valuable, as it can be used along the edge of shrubs. It is also very effective in large beds, and at the same time is very satisfactory when planted single and allowed to increase year after year, making a very large clump. Among the most interesting and pleasing varieties we have the following:

- **Canarie**. White, with brilliant yellow centre. Price, 75 cents.
- **Comte de Jussieu**. Rich pink, with yellow centre. Price, 50 cents.
- **Festiva Maxima**. Pure white, flushed with purple. Price, 50 cents.
- **Lady Lenora Branwell**. Silvery rose. Price, 50 cents.

Among the early blooming varieties we have the following:

- **Officinalis Rubra Piena**. Very double. Brilliant crimson. This is the most prolific Pæonia of the entire list. Early in blossom. Price, 50 cts.
- **Tenuifolia** (*fit. pl.*). Crimson flowers. This Pæonia is different from any on the list. Its foliage is very finely cut and it is a dwarf-growing plant. It blooms a little earlier than Officinalis Rubra Piena. $1.00.

**Tree Pæonies.**

Under this list of Pæonies we have
FRUITS.

Bismarck Apple. This is one of the new introductions in the fruit line, being very popular, owing to its extreme earliness of ripening. It is a dwarf-growing tree. We have 2-3 ft. trees full of bloom buds. It is proper to plant in gardens 4-6 ft. apart, and receive a good crop within a very short period. It is an excellent variety to be used in pot culture, trees often 2-3 years old from bud bearing quite successfully. Price, 50 cents.

Ben Davis. This is one of the most reliable shipping apples that we have to-day, it being very popular among exporters on account of its not rotting as easily as most varieties when bruised. It grows well in all parts of the country and is one of the most profitable for the market. It is a large, roundish apple, striped red and yellow, and an early bearer. Its flesh is tender, and has a mild, sub-acid flavor. Aearly and abundant bearer. Price, 50 cents.

McIntosh Red. A person liking a highly-colored apple will not be disappointed in this variety. It is a flat, medium-size apple with a very brilliant red color. Price, 50 cents.

PEARS.

Josephine de Malines. Medium to large, roundish pear. Its flesh rose-colored and delicately perfumed. The tree is of a regular growth, having small leaves. It is a good, long-keeping table pear, very desirable. It is also a late winter pear. Price, 75 cents.

Colonel Wilder. This is one of the most recent introductions; and is also one of the longest-keeping pears that we have. It is quite large, oblong, inclined to oval. The color is yellow, dotted with russet. The flesh is very juicy and sweet. This pear will keep until about the month of March. Price, 75 cents.

PLUMS.

There has been in the last few years quite an improvement in the cultivation of plums. One of the most important classes of plums having lately been put upon the market is the Japanese varieties being introduced by Mr. Luther Burbank, of California. Mr. Burbank has been the most successful introducer of some of the leading varieties of this class of plums. These plums are undoubtedly desired on account of their vigorous qualities, their early bearing, and their being free from curculio, black-knot, and other damaging diseases of the plums. The most important varieties are

Abundance. Fruit large; amber turning to a rich bright cherry. Flesh light yellow and very sweet. This is one of the most productive of our entire list of plums. Price, 75 cents.

Wickson. One of Mr. Burbank's Hybrids and considered by him one of his finest productions. Very large, color carmine, with a white bloom. Flesh very sweet. It has a remarkably small stone. It is also an excellent long-keeping variety. Price, 75 cents.

are quite certain that among them are some of the finest colors that can be obtained. The plants are in first-class condition to give good flowering results. Mixed varieties. Price, 50 cents.

We would like to say that outside of this list of perennials that we have already given you we have quite a large collection of Iris, both the German and Japanese, Phlox, Spirea, and all of the other leading varieties of Herbaceous Perennials.

FRUITS.

PEACHES.

Crosby. This is to-day the most successful peach of the entire list that is on the market. Its bearing qualities are excellent and it is a sure cropper when all other varieties have failed. It is not quite as large as Crawford's Early, but comes in about the same time. The color is orange, slightly dotted with crimson. Flesh is bright yellow and very juicy. Price, 35 cents.

Alberta. This is one of the finest of the new introductions. Very hardy variety and is adapted to almost any soil. Flesh yellow, juicy, and of a fine flavor. Ripening a little later than Crawford's Early. Price, 35 cents.

Champton. This is also a new early variety. Large size and creamy-white in color, with a red cheek. Its flavor is very sweet, and it is an excellent shipper. Price, 35 cents.

GRAPE.

Among the newer introductions of grapes we have Campbell's Early. This grape was put on the market a few years ago by the originator of the Delaware grape. We all know what the Delaware grape is as to its quality and flavor, it being considered by many horticulturists as the standard of excellence. This grape is very highly flavored and has a good tough skin. It is considered a fine keeper and the market grape that we have. Price, 50 cents.

McPike. This is also a new introduction. It is a black variety and is considered a very desirable grape. It is a seelung of the Odewen, and it is known to many horticulturists as a far superior grape to the Odewen. Price, $1.50.

CURRANTS.

President Wilder. A new red currant. Fruit large, fine flavor, and a great yielder. For making jelly this is considered the best currant there is grown. Keeping the longest and having a fine color, it is the best on the market to-day. Price, 24 cents: $2.00 per dozen.

BLACKBERRY.

Iceberg. This is one of the latest introductions in the way of blackberries, being introduced by Mr. Luther Burbank, and is a white blackberry. This is considered a very hardy berry, standing a temperature of 18 to 20 degrees and coming out all right. It is a very early berry, ripening as early as the first week in July. This blackberry when not fully ripened is slightly bitter, although when fully ripened the flavor is very sweet and pleasing, there being no hard core to the berries. It has a great profusion of berries, being borne in large clusters. Price, 20 cents each; $2.00 per dozen.

RASPBERRY.

Cumberland. A new black-cap of the highest quality. Fruit very large. Very productive. Quality excellent. Price, 20 cents each; $2.00 per dozen.
FRUITS.

See our Illustrated Descriptive Catalogue of 100 pages for full descriptions of and cultural directions for the two hundred or more varieties of Hardy Large and Small Fruits that we offer.

See Novelty List for the latest introductions.

VINES.

See our ILLUSTRATED DESCRIPTIVE CATALOGUE for full descriptions of and cultural directions for over one hundred varieties of Vines, a part only of our entire collection. Rapidity of growth and season of bloom are indicated below.

**ACTINIDIA polagama.** Rapid. Sum. Large Each. Doz. white clusters........................................... $0 35 $3 50

**AKBIA quinata.** Rapid. Spg. Dense clusters of purple. 35 3 50

**BITTER SWEET (Celastrus).**
American or Roxbury Waxwork (C. Scandens), Rapid. 35 3 50

**Japanese (C. paniculata).** Mod. Aut. Orange berries. 50 5 00

**BOSTON IVY (Ampelopsis Veitchii).** Rapid. Showy foliage. 35 3 50

**BRAMBLE, Cut-leaved (Rubus lactintius).** Sum. Rapid 35 3 50

**CLEMATIS.**
**Crisped (C. crispa).** All Sum. Mod. Lavender. 25 2 50

**Heavy-scented (C. graveolens).** All Sum. Mod. Yellow. 25 2 50

**Panicled (C. paniculata).** Extremely rapid. AUT. Clouds of fragrant white flowers. 50 5 00

**Scarlet (C. coccinea).** All Sum. Mod. Scarlet. 25 2 50

**Virgin's Bower (C. Virginiana).** AUT. Rap. White. 15 1 50

**Vine Bower (C. vitaceia).** All Sum. Rap. Purple. 25 2 50

**Named Hybrids,** as noted. Light plants. Very extra blooming-size plants, $1.00 to $1.50.

**White varieties:** Henry, Duchess of Edinburgh (Dbl.); Mrs. James Bateman, Jackmanii Alba, etc., etc.

**Purple shades:** Alexander, Countess of Lovelace (Dbl.); Jackmanii, John Gould Veitch (Dbl.); La France; Lawsoniana; Rubella; Sir Garnet Wolseley, etc., etc.

**Red shades:** Kormesiana, Star of India, Fairy Queen, etc., etc.

**HONEYSUCKLE.** (Lonicera).

**Chinese Evergreen (L. brachypoda).** Rapid. Sum. 35 3 50

**Hall's (L. Halliana).** Rapid. All Sum. 25 2 50

The above are nearly evergreen and bear a continuous profusion of showy yellow and white intensely fragrant flowers.

**WOODBINE (Ampelopsis quinguifolia).** Rapid. Healthy foliage, brilliantly colored in autumn. 25 2 50

**HONEY SUCKLE.** (Lonicera).

**Dutch or Belgian Monthly (L. Bellica).** Med. All Sum. Buff and red. $0 35 $3 50

**Golden variegated.** Leaves netted with gold. 35 3 50

**Coral or Scarlet trumpet (L. semperflorens).** Med. Orange scarlet all summer. 25 2 50

**IVY, ENGLISH ( Hedera).**
**English (H. Helix).** Mod. Showy evergreen foliage. 35 3 50

**GIANT (H. H. Regeneriana).** Hardest sort. 35 4 00

**MATRIMONY VINE (Lycium).**
**Common (L. Barbarum).** Rapid. Sum. Orange fruits. 25 2 50

**Chinese (L. Chinensis).** True. Rapid. All Sum. Festoons of bright coral-red fruits. 50 5 00

**ROSES, CLIMBING (Rosa).**
Named double sorts as follows: Strong plants 50 4 00

**Dawson (pink); Falmere Bell (white); Blairst (blue); Queen of Prairie (red); Gem of Prairie (fragrant, red and white); Empress of China (rich pink); Bessie Johnson (blue); Jules Margot (carmine rose), etc., etc. See Catalogue.

**Creeping (R. repens).** Rap. Sum. White Fragrant. 50 4 50

**Japanese Trailing (R. Wichuralana).** Rapid. Sum. 50 4 50

Clusters of fragrant creamy-white flowers. Elegant glossy-green, almost evergreen foliage. A dense cover plant for banks, graves, etc.

**Multiflora (R. multiflora).** Rapid. E. Sum. Clusters of creamy white flowers. 50 4 50

**Prairie (R. reptile).** Rap. Sum. Single pink. 50 5 00

**SILK VINE (Periplaca Granca).** Rap. Sum. 35 3 50

**TRUMPET VINE (Bignonia radicans).** Clusters of orange scarlet. Rapid. Sum. 35 3 50

**WISTERIA.**

**American (W. frutescens).** Rapid. Sum. 35 3 50

**Chinese (W. chinensis).** Rapid. E. Sum. and Aut. Fragrant; light blue. 50 5 00

**Japanese (W. millijuga).** Rapid. Sum. Choice. Clusters of deep blue. 75 7 50

**White (W. C. alba).** Pure white clusters. 1 00

Large Specimen Trees, Shrubs, and Coniferous Evergreens can be supplied in numerous rare and common forms, at prices in proportion to their rarity and individual perfection.

A personal inspection of such stock by persons requiring plants for immediate lawn effect is desirable.
CONIFEROUS EVERGREEN TREES.

Our collection of Coniferous Evergreens has been for many years past, and is at present, the most complete in New England, and one of the finest in America.

For full descriptions of cultural directions for over one hundred and fifty varieties, a part only of our entire catalogue, see our Illustrative Descriptive Catalogue of 100 pages.

ABBREVIATIONS. Lg. Trees exceeding 50 feet in height at maturity; Med., Trees 25 to 50 feet at maturity; Sm., Trees 10 to 25 feet; Dwf., Shrubs of low yet upright habit; Crgp., Trailing sorts.

All our Evergreens are carefully transplanted at frequent intervals to insure the best of fibrous roots, and the best results in removal are consequent.

ARBOR VITAE (Thuja). Each. Doz.
American (T. occidentalis). Med. 3 to 4 ft. $0 50 $8 00
Rapid pyramidal growth. 3 to 5 ft. 1 00 10 00
See also under Haplo trees.
Cloth of Gold (T. occidentalis). Med. 2 to 3 ft. 1 50 7 50
Handsome golden variegation. 3 to 4 ft. 1 00
Hovey's (T. occidentalis). 3 to 4 ft. 1 00
Dwarf. 1 to 2 ft. 50 5 00
Geo. Peabody (T. occidentalis). Sm. 75 7 50
Rich golden foliage. Sm. 3 to 4 ft. 1 00
Siberian (T. sibirica). Sm. 1 to 2 ft. 50 5 00
Rich deep green at all seasons. 3 to 4 ft. 1 00
Woodward (T. occidentalis). Dwf. 12 to 15 ft. 50 5 00
A choice low hedge plant. 11 ft. 1 00
Pyramidal (T. pyramidalis). Lg. 50 5 00
Columnar habit. 3 to 4 ft. 1 00
Rich green color at all seasons. 3 to 4 ft. 1 00

CYPRESS, JAPANESE (Cryptomeria japonica) Each. Doz.
Dwarf (C. japonica). Dwf. Dense. 1 ft. 1 00
Heath-leaved (C. japonica). Lg. 11 ft. 3 00
Obuse-leaved (C. japonica). Sm. 75 7 50
Pea-fruited (C. japonica). Sm. Fine foliage. 75 7 50
Plumey (C. plumosa). Elegant foliage. 3 ft. 75 7 50
One of the best for fast growth. 1 to 2 ft. 50 5 00
Golden plumey (C. japonica). Sm. Golden tipped. 75 7 50
Will bear close pruning. 2 to 3 ft. 75 7 50
Squarrose-leaved (C. squarrosa). Sm. Silvery. 1 to 2 ft. 75 7 50
Unique in color; elegant in foliage. 2 to 3 ft. 1 00
Thread-branched (C. squarrosa). Sm. Pendulous. 1 to 2 ft. 1 00
Elegant drooping. 2 to 3 ft. 1 00

PICEA, CEDAR. Each. Doz.
Balsam (Picea pungens). Lg. Rapid growth. 2 to 4 ft. 50 5 00
Recomended (P. pungens). Sm. 75 7 50
Cephalonian (P. pseudocedrus). Lg. 11 ft. 1 00
European (P. abies). Sm. 75 7 50
Nordmannia (P. abies). Lg. 1 00
Rich green. One of the finest. 2 to 3 ft. 1 50
White or Concolor (A. concolor). Lg. 2 ft. 1 00
Rich silver foliage. Colorado species. 3 ft. 1 00

HEMLOCK (Tsuga). Each. Doz.
Common (T. canadensis). Lg. 2 to 3 ft. 50 5 00
Graceful habit; light-green foliage. 3 to 4 ft. 75 7 50
Trimplanted (T. canadensis). Lg. 1 00
Trimplanted conical specimen. 3 ft. 2 00
Carolina (T. caroliniana). Lg. 1 00
Beautif. recent introduction. 3 to 5 ft. 50 15 00

JUNIPER (Juniperus). Each. Doz.
Glaucus (J. virginiana). Sm. 2 to 3 ft. 75 7 50
Beautiful silvery foliage. 3 to 4 ft. 1 25
Golden prostrate. Crgp. 1 ft. in diameter. 1 00
Golden foliage. Forms a dense carpet. 1 to 2 ft. 1 50

Common or Red Cedar (J. virginiana). Med. 2 to 5 ft. 50 5 00
A neglected native. 2 to 3 ft. 75 7 50
Irish (J. communis Illicerna). Sm. 2 ft. 75 7 50
Rich green. Column habit. 3 to 4 ft. 1 00
Swedish (J. communis Sveicaria). Sm. 2 ft. 75 7 50
Light-green foliage. Pyramidal. 3 to 4 ft. 1 00

Austrian (P. austriaca). Med. 2 to 3 ft. 50 5 00
Heavy foliage. Dense growth. 3 to 5 ft. 1 00
Fine for poor soils or seashore planting.
Botan (P. excelsa). Med. 2 to 3 ft. $1 00 $10 00
Dense light-green foliage. 2 to 3 ft. 1 50
Mugho (P. mugho). Lg. 1 to 2 ft. 50 5 00
Globular habit. Dark green. 1 to 2 ft. 75 7 50
Red or Norway (P. resinosa). Lg. 75 7 50
Rare and effective native. 4 to 5 ft. 1 00
Scoth (P. sylvestris). Med. 2 to 3 ft. 50 5 00
Glaucous foliage; dense habit. 3 to 4 ft. 75 7 50
For poor soil or seashore. 4 to 5 ft. 1 00
Swiss Stony (P. cembra). Med. 1 to 2 ft. 75 7 50
Dense habit. Light-green foliage. 2 to 3 ft. 1 00
White or Weymouth (P. strobus). Lg. 11 ft. 35 3 50
Rapid growth; light-green foliage. 2 to 3 ft. 50 5 00
Our finest native evergreen. 4 to 5 ft. 1 00
Choice for forest planting. 6 to 7 ft. 1 50

Rugulosa (P. rugulosa Douglasi). Lg. 75 7 50
Beautiful, light-green, soft foliage. 3 to 4 ft. 1 00
Englemann's (P. englemanni). Lg. 2 to 3 ft. 1 00
Rare and choice. Colorado species. 3 to 4 ft. 1 00
Norway (P. excelsa). Lg. 2 to 3 ft. 35 3 50
Rapid growth; very hardy. 3 to 4 ft. 50 5 00
One of the best for general use. 4 to 5 ft. 75 7 50
All sizes in stock. 3 to 6 ft. 1 00
Coastal N. P. compactum. Dwf. 75 7 50
Rocky Mountain Blue (P. p. glauca). Lg. 1 to 2 ft. 2 00
Highly silver effect of foliage. 2 to 3 ft. 3 00
Our stock has been selected and propagated for the highest silver effect. Larger sizes.
Tiger Tail (P. polita). Med. 2 to 3 ft. 1 00
Rare and choice Japanese species. 3 to 4 ft. 2 00
White (P. alba). Med. 1 to 2 ft. 50 5 00
Dense growth, light-green foliage. 2 to 3 ft. 75 7 50
Choice and hardy in all situations. 3 to 4 ft. 1 00
Can be especially recommended. 5 to 7 ft. 1 00

BLUE WHISPERER (P. p. glauca). Lg. 2 to 3 ft. 75 7 50
Rich shades of glaucous green. 3 to 4 ft. 1 00
Dense growth. 4 to 5 ft. 1 00
A fine substitute for the Rocky Mountain Blue Spruce where the high price of the latter may prove excessive. 1 50

UMBRELLA PINE (Sciadopitys verticillata). Sm. 18 in. Unique. 1 00
Larger sizes in stock.

YEw (Taxus). Each. Doz.
American or Gown Hemlock (T. canadensis). Spg. 75 7 50
Dense low habit. For shade or sun. 2 ft. 1 00
English (T. baccata). Dwf. 1 to 2 ft. 75 7 50
Irish (T. b. Fastigiata). Sm. 2 ft. 75 7 50
Japanese (T. cuspidata). Dwf. 9 to 12 in. 1 25
Rare. Perfectly hardy. 1 to 1 ft. 2 00

See Descriptive Catalogue of 100 pages for many other sorts in addition to the above.
HAR_DY HERBACEOUS PERENNIALS.

Of these we have the finest collection in the country, which is fully described in our most complete Illustrated Descriptive Catalogue.

Below we describe those sorts which we can most highly recommend, embracing as they do the cream of our entire collection for free-blooming effect; and all are perfectly hardy, and, once planted, increase in size and blooming effect yearly, and require but one purchase to have for all time.

We have indicated the height to which they commonly attain in the flower-border, as well as their blooming season, to assist in selection.

ACHILLEA the Pearl. 2 ft. All sum. Each. Doz. Double white clusters $0.01 15 50
AJUGA Genevensis (Geneva Bugle). 6 in. S. Rich blue spikes. 10 0.25 50
ALTHAEA rosea. 2 ft. S. Var. alba. Choice pure white flowers. 10 2.00 25
ANEMONE japonica (Japanese Windflower). 3 ft. Each. Aut. var. alba. Choice pure white flowers. 25 2.00 50
ANTHEMIS (Gnome). 2 ft. All sum. $1.50
ANTHERICUM iiliiatra (St. Bruno’s Lily). 2 ft. S. White spikes. 25 2.50 50
AQUILEGIA chrysantha (Golden Columbine). 3 ft. All sum. Very rich. 25 2.50 50
ARABIS alba (Rocky Rose). 8 in. S. Fragrant, white. 25 0.25 50
ASCLEPIAS tuberosa (Butterflyweed). 2 ft. Sum. Heads of orange. 25 2.50 50
ASTER novi-belgii (Aster). 5 ft. Aut. $2.00
ASTILBA japonica. 1 ft. S. Dense white spikes. 25 2.50 50
BOLTONTA latissquama. 4 ft. Aut. Numerous lemon-yellow flowers. 25 2.50 50
CALANTHUS Brooklyn (Hairbell). 1 ft. All sum. Blue or white. 25 2.50 50
CENTAUREA montana (Mountauk Cornflower). 1 ft. All sum. Purple. 25 2.50 50
CORONOPSIS lanceolata (Golden Tickseed). 2 ft. Sum. Yellow. 25 2.50 50
DORONICUM plantagineum (Leopard’s Bane). 1 ft. S. White. 25 2.50 50
ERIGERON speciosus (Featherseed). 2 ft. S. Rich purple. 25 2.50 50
BULBISFARIA variegata. ft. Variegated gold and green foliage. 25 2.50 50
BULBILIA zebra (Zebra Grass). 5 ft. Hand-bred barbed foliage. 25 2.50 50
FUNKIA Showy foliage. 25 2.50 50
grandiflora (Grape-thistle). 2 ft. All sum. Blue shades. 25 2.50 50
GERANIUM sanguineum (Cranberry). 1 ft. Sum. Red flowers. 25 2.50 50
GYPSOPHILA paniculata. (Gypsophila). 2 ft. S. All sum. Breath. 25 2.50 50
HELENIUM Hoopoe (Hoeone). 4 ft. Sum. Broad heads of rich yellow. 25 2.50 50
HELICANTHUS Rosea. 1 ft. S. Flesh pink. Evergreen. 35 3.50 50
HELICANTHUS latiflorus (Semi-double Helicanthus). 2 ft. S. Multiflorus var. B. F. Intense color. 35 3.50 50
HIBISCUS Crimson Eye. 4 ft. Sum. Showy flower spikes. 25 2.50 50
HOLLYHOCKS in variety. 4 ft. Both double and single sorts. 20 2.00 0.25
IBERIS sempervirens (Hardy Candytuft). Each. Doz. 1 ft. S. Spig. Evergreen. White. $2.25 25 2.50
IRIS Germanica. 2 ft. Sum. White, purple, and golden shades. 25 2.50 50
Japanese. (Koenigiana). 2 ft. Var. white, blue, and golden shades; large showy flowers. 30 3.00 50
KNIPHOFIA aloides ( Torch-lily). 3 ft. S.-orange and red. 25 2.50 50
LACRYMYS Iris. 1 ft. S. Var. alba. Choice red clusters. 25 2.50 50
LIPINUS polyphillus. 3 ft. S. Beautiful spikes of blue. 25 2.50 50
LYCHNIS chalcedonica (London Pride). 3 ft. Sum. Heads of scarlet. 25 2.50 50
vespertina var. f. t. (Double White Camomile). 25 2.50 50
var. f. t. (Ragged Robin). 1 ft. Sum. Rich red. 25 2.50 50
LYCOBROTUS. 4 ft. Sum. Long spikes. 25 2.50 50
MYOSOTIS palustris (Forget-me-not). Corg. All sum. Beautifully covered with flowers. 25 2.50 50
MONARDA didyma (Onego Tea). 2 ft. All sum. Heads of cardinal. 25 2.50 50
PAPAVER orientale (Oriental Poppy). 2 ft. Sum. Showy spikes of scarlet, pink, or purple. 35 3.50 50
PAPAVER variagata (Ribbon Poppy). 2 ft. Sum. Pink, white, and crimson. 25 2.50 50
PENTSTEMON digitalis (Beard-tongue). 3 ft. Sum. White spikes. 25 2.50 50
PHALARIS arundinacea var. variegata (Circumcised Grass). 2 ft. Summer. 15 1.50 50
PHLOX amoenia (Lovely Phlox). 6 in. Spig. Clouds of rich pink. 25 2.50 50
P. orientalis. (World’s Favorite). 6 in. Spig. Clouds of crimson. 25 2.50 50
P. hybridus. A hybrid of great variety. White, red, purple, or red and white. 25 2.50 50
PLATYCODON grandiflora (Giant Harebell). 3 ft. S. Sum. White or blue. 25 2.50 50
POLEMION corneum (Jacob’s Ladder). 2 ft. S. Spig. Blue (Charity). 25 2.50 50
POTENTILLA alpina (Alpine Potentilla). 1 ft. Sum. Very fragrant. Yellow, orange, or combined. 35 3.50 50
PRIMULA officinalis (Polyantha). 8 in. Spig. Red, white, and purple. 25 2.50 50
PYRERITHUMS, Hybrids. Double red, white, pink, purple, and combined. Choice. 35 3.50 50
RUDBECKIA speciosa (Showy Cone-flower). 2 ft. S. Sum. Orange. 25 2.50 50
sub-ternata. Both with showy purple centres. 25 2.50 50
SACHSIA Caulacica. 18 in. All sum. Large, rich lavender. Fine. 25 2.50 50
SEDUM spectabile (Showy Stone-crop). 1 ft. S. Heads of pink. 25 2.50 50
SILLEN Versicolor (Silent Bow). 3 ft. S. Sum. Showy flowers. 25 2.50 50
SOLANDER rigida (Golden-rod). 2 ft. S. Sum. Yellow flowers. 25 2.50 50
SPIREA Annum (Goat’s-beard S.). 4 ft. S. Sum. Creamy white. 25 2.50 50
S. (Flamingo). Variegated, red, and green foliage. 25 2.50 50
palmata. 5 ft. Sum. Showy foliage. Crimson spikes. 25 2.50 50
STATICE latifolia (Sea Lavender). Lavender sprays. 25 2.50 50
THYMUS argentea variegata (Silver Thyme). Showy variegated. 25 2.50 50
TROLLIUS Europeus (Globe-flower). 2 ft. S. Sperg. and aut. fragrant. 25 2.50 50
VACANT AMETHYSTS. In June. Spikes of amethyst. 25 2.50 50
Lonicera var. subserissa (C. F. Spig. Long blue. Fine. 30 3.00 50
rupestris (Creeping S). Spig. Evergreen. 25 2.50 50
VIOLET. Intensely fragrant. Hardy. 25 2.50 50
YUCCA filamentosa (Adam’s Needle). 4 ft. S. July. Cream white. 25 2.50 50
STREET SHADE TREES.

Of these we have a very fine supply of clean, thrifty transplanted stock, in best possible condition to produce quick results. We invite an inspection of our stock, which will be found to compare favorably with any to be found elsewhere. Special rates given in extra large quantities. In many cases we are able to supply a limited quantity of very extra heavy trees for immediate effect; these trees may vary from 12 to 20 feet high, and from 3 to 8 inches in diameter. Price upon selection.

ASH, American. 6 to 8 ft. .................. $1 00 $2 00
Rapid growth. Select. 8 to 10 ft. ......... 6 00 10 00
Very heavy. 10 to 12 ft. .................. 10 00 20 00
CATHA PEA. 6 to 8 ft. .................. $2 00 $4 00
CHESTNUT, American Sweet. 5 to 7 ft. 1 00 2 00
EUCALYPS. 6 to 8 ft. .................. $3 00 $6 00
Very effective. 8 to 10 ft. .................. 6 00 10 00

ter color, and especially recom-1-2 ft. 2 00 4 00
mended for seashore planting. 2-5 ft. 6 00 12 00
10 00 20 00

LANDSCAPE GARDENING.

We have very complete facilities for supplying planting plans for improvements to parks, cemeteries, or private grounds. This department is under the charge of a competent landscape gardener, whose work for several years past has given the best of satisfaction to his clients. Personal visits made to give suggestions and advice, or for the purpose of taking data for the formation of complete planting plans, and, when desirable, the superintendence of the work can be undertaken by him. Charges for services stated upon application.

The saving gained by special rates alone, that can usually be arranged where the entire work of orna-
menting a place is undertaken in a systematic and complete manner, often far exceeds the original cost of plans and advice.

Correspondence Solicited.
